

This is your chance to get free, hands-on experience with the latest green building technology. Join us as we spend a week building the exterior of our two LEED Platinum homes and get advice, training and tips on SIPs construction directly from the experts at SURETIGHT.

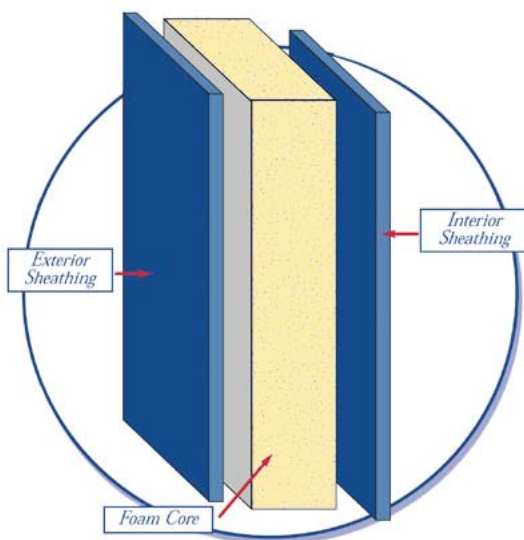

When: November 4 - 8
Where: 2100 E. Susquehanna Ave. Philadelphia, PA 19125
Who: Contractors, Framers and Builders (only 8 spots available)
How Much: \$0 . . . Free . . . Really, this doesn't cost anything.

SIPS training normally runs around \$1,000 - 1,500 and requires travel and lodging for 3-4 days. This is a great opportunity to get the same training and experience here in Philadelphia without spending a dime. The speed and affordability of SIPs construction is something you must experience to believe.

Why are we doing this? Well, we would like to see SIPs construction become a more common thing in Philadelphia. It is better for the environment and better for our city. Our whole project is a learning experience and this is our chance to include others in that educational process.

Space is limited to 8 spots for the full event so sign up today.
